

CONTACT CLEANERS

Generally, contacts fall under one of three categories: New, dirty, or corroded/oxidized. Depending on the condition of the contact, a careful selection of a contact cleaner is required.

CONTACT CLEANER WITH SILICONES

Cat. No. 404B

This contact cleaner should be used on contacts in harsh or dusty environments. It cleans with a unique blend of high purity solvents and protects your contacts with a dry electronic grade silicone lubrication. With a dry lubricant, it is able to repel moisture in humid environments and not attract dust.

Preserves new contacts in Harsh or dusty environments

SUPER CONTACT CLEANER WITH PPE™

Cat. No. 801B

Super Contact Cleaner w/ PPE is specially formulated to improve conductivity and provides long-lasting protection on base metals and precious metals such as silver, copper, bronze, etc. Will provide life time protection on gold contacts.

- ▶ Improves conductivity
- ▶ Extends the life of contacts for optimum signal quality
- ▶ Protects against oxidation and tarnishing
- ▶ Reduces abrasion wear and tare
- ▶ Protects gold for life
- ▶ Safe on plastics
- ▶ Meets Bellcore spec. RT-NWT-00078

Preserves new contacts in regular environments

OXIDE SCRUBBER

Cat. No. 802-H

This Oxide Scrubber can be used on rusted or corrode contact that you can access. Use one of our contact cleaners with lubrication after all the rust or corrosion has been eliminated to extend the life of the newly polished contacts.

For Corroded/oxidized contacts

APPLICATION

Use on new systems to maintain performance and prevent from oxidation. Reduces contact scrubbing and reduces connection wear and abrasion failures. Ideal for new system contacts or contacts that are dirty and slightly oxidized.

NEW

SUPER PENETRATING LUBRICANT™ Cat. No. 8472-125ML

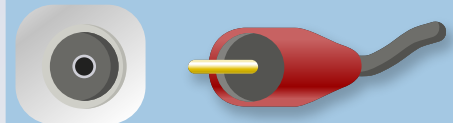

Use this on corroded or oxidized contacts prior to the use of either our Contact Cleaner with Silicone or our Super Contact Cleaner. The superior penetrating abilities of our Super Penetrating Lubricant will attack the rust or corrosion bringing your contacts back to life.

For Corroded/oxidized contacts

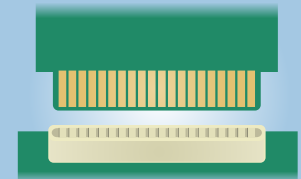

TYPES OF CONTACTS

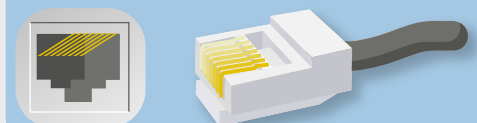

RCA Plug type ▶ Stereos, audio equipment

PCB Type ▶ Expansion cards, PCI boards

RJ Type ▶ Telephone, network cabling

ELECTROSOLVE CONTACT CLEANER™ Cat. No. 409B

This effective and powerful cleaner should be used prior to using contact cleaners with lubrication. This zero residue contact cleaner quickly penetrates and dissolves most soil types and greases allowing lubrication to properly bond to your contacts.

For Dirty/greasy contacts
